

THE BORDERCRAFT WALLRACK

The Bordercraft Wallrack has many applications away from the kitchen - the adjustable shelves are ideal for storage of video tapes, CD's, and displays of collectables

We are happy to quote to make wallracks to virtually any non standard overall size up to a maximum of three metres wide and two metres tall. We will also, wherever possible, propose bespoke design solutions for any unusual applications. Stamp collections, numismatists, entomologists and beer mat collectors please note!

All cookery items shown in this leaflet, other than the wallrack and its accessories, were supplied by The Cooks Haven, Hereford. The letter boxes are part of Mr. Vaughan Winter's private collection. These items are included for illustrative purposes only and are not supplied by Bordercraft, neither separately nor are they included with any order for Wallracks and Wallrack accessories. Bordercraft reserve the right to amend the designs and material details of Wallracks and Wallrack accessories in line with a policy of constant improvement.

THE WALLRACK

THE KITCHEN WALLRACK

We build it - *then* you design it!

First and foremost, a kitchen is a workshop. To operate efficiently, tools must be to hand when needed yet safely stored when not in use. Rummaging in the back of a drawer or cupboard for a carving knife or the right size saucepan is certainly *not* efficient - particularly when you've got flour on your hands and the Hollandaise is about to curdle.

The Kitchen Wallrack offers infinitely adjustable and adaptable storage for saucepans (*with* their lids!) knives, wooden spoons, and 101 other tools and utensils in exactly the same way that a good mechanic stores his spanners, wrenches and screwdrivers.

The Wallrack is 1285mm tall and comes in three widths - 600mm, 900mm and 1200mm. Intermediate sizes can be supplied to a special quote. The Rack is available in solid Iroko, Maple or Oak.

Each item can be positioned and repositioned at will, at any place on the rack and *without the use of tools*, making the accommodation of new kitchen utensils simplicity itself. The key to this versatility is the precision machined hooks behind each component

The standard Wallrack frame is 1285mm high and available in 3 basic widths - 600mm, 900mm, and 1200mm. (bespoke widths available on request).

The optional cornice is supplied as shown or with one or both ends trimmed square to suit installation.

Repositioning items on the rack.
Most items can be repositioned in a couple of seconds only! The plate rack and shelves - perhaps fifteen.

Fig 1. The paper towel holder.
Slide one bracket away from the holder, twist and lift upward. Takes standard kitchen roll.

Figs 2. The plate rack
Remove the dome-nuts under each brass bracket. Lower the front of the shelf and unhook from the rack. 450mm wide, 290mm deep only. Ten slots for plates between 195mm and 290mm diameter. Each slot will accept at least 2 dinner plates and the flat surface makes it useful also for other items such as mugs, NOTE: The plate rack is *not* suitable for draining wet items.

Figs 3 and 5. The knife block and spoon box.
Simply hook securely under the slat at whatever position you choose. The knife block is 240mm high, 110mm deep and 195mm wide and has slots for eleven knives. The spoon box is 220mm high, 110mm deep and 195mm wide.

Figs 4. The rail for saucepan lids.
Twist the spacers a quarter turn and unhook the whole assembly with an upward and outward motion. Standard lengths 600mm, 900mm or 1200mm.

Figs 6. The shelves.
Attach and remove as plate rack. Standard lengths 600mm, 900mm or 1200mm, all 160mm deep. Available with or without grooves for displaying plates.

Figs 7. The Spice rack
Accepts small items up to 60mm deep. Standard width 400mm. Lift off brass gallery rail and unhook shelf upwards.
